

- 1) Document the specific complaint or injury – declining well performance or dry well for example (attach additional sheets, if necessary to describe situation).

- 2) Please provide any available data about your well; including total depth and depth of the well casing perforations (listed on the original well drillers report), age, location (attach a sketch map of well location on property), construction, typical performance as gallons per minutes, type of pumping equipment – pump, motor, horsepower.

- 3) Provide a detailed written description of the problem, with as many specifics as possible; for example, description of the problem, when was the problem first noticed, and frequency of problem, etc.

Send your information to the Independent Engineer at the address listed below, for evaluation:
